

VERTICAL ACCESSORIES

Features & Benefits:

- **Enhanced Safety** - Advanced systems like alarms, security locks, and beacons help protect operators and equipment.
- **Improved Efficiency** - Organizational tools like power material trays and tool trays keep everything within reach, streamlining operations and saving time.
- **Customization for Specific Tasks** - Adaptable accessories such as crane hooks and guide rollers ensure your lift is ready for any job, enhancing versatility.
- **Damage Prevention** - Protective systems, including anti-vandalism features and frame bumpers, safeguard your lift from wear and tears.

VERTICAL ACCESSORIES

Alarm Systems

Option/Accessory	Anti-Vandalism	Gate Alarm	White Noise Alarm	Programmable Security Lock	Beacon, Dual	Single Beacon w/ Cover	Ambient Adjusting Alarm
Description	A system or accessory that prevents unauthorized access or damage to the lift, ensuring security on the job site.	An alarm system that triggers if the gate is opened during operation.	An alarm that emits a non-piercing white noise, often used in noise-sensitive environments.	A lock that allows for customizable security settings, preventing unauthorized use of the vertical lift.	A dual-beacon system for enhanced visibility, often used in low-light or outdoor conditions.	A beacon that signals lift operation, covered to protect from debris or weather.	A warning system that adjusts its sound levels based on the surrounding noise to ensure its heard in varying environments.

Control and Sensing Components

Option/Accessory	Object Sensing Pad	Remote Manual Descent	PCB Cover	Inverter
Description	A sensor pad that detects obstacles or objects near the lift, preventing collisions.	A manual override system allowing the lift to be safely lowered in case of power failure or other emergencies.	A protective cover for the platform control box (PCB), safeguarding operators' hands during operation.	A power component that converts DC power from the battery to AC power for various operations of the lift.
