- Heightened Productivity The 1850SJ is much faster to full height, so operators can spend more time working and less time positioning the boom. The axles take approximately one minute to extend or retract. They're able to pivot in and out and do not telescope like extendable axles on other Ultra Series boom lifts.
- Greater Work Envelope Telescoping jib and five section boom provides over 2.9 million cubic feet of work area and greater ability to reach up and over. An LCD screen shows operators where they are in the work envelope along with other useful information.
- More Capacity Featuring dual 1,000 lb/500 lb, the 1850SJ is the most powerful boom in the industry. Plus, the operator can move just the jib, rather than the whole boom, for greater maneuverability and more precise positioning.
- Ease of Transport No oversized load permit needed (over weight permit is required for highway transportation).
