TIRES

Protect Your Surface Area

TIRE SOCKS® protect finished flooring from scuff marks caused by rubber tires and debris transfer. Constructed using heavy duty fabrics and made to fit any size tire, TIRE SOCKS have several advantages over similar products currently on the market. They are easy to install, don't slip off the tires and self center as you drive.

Features and Benefits Include:

- Provides surface protection
- Constructed using a heavy-duty 1680 ballistic nylon fabric that lasts longer than other socks available in the market
- Heavy-duty bungee cord covered with nylon to provide heavy duty elasticity to prevent tire socks from slipping off wheel while in motion
- Heavy-duty bungee self-centers sock when machine is in motion
- Durable, water repellent top coat
- Tested and approved for JLG® booms and scissors
- Installs in 3 easy steps
- Heavy duty tire socks with twice the material are ideal for tires over 40" and on machines that will be on the jobsite for more than two weeks. Select heavy duty part numbers are available now, others are available upon request.
