Protect Your Investment

A brick guard provides extra protection for your telehandler. There are two separate brick guards - one for the top and one for the front.

Brick guards are ideal for sites lifting brick, block or any other debris that can fall. Features include:

• ASTM A36 steel construction
• Open and closed cab applications
• No affect on the use of the windshield wiper

NOTES:
• When assembling a front brick guard with a top brick guard (p/n 1001100879), the top brick guard flange should be mounted under the front brick guard flange.
• For machines equipped with work lights, the work lights should be mounted below the brick guard’s upper mounts.
• When installing a top brick guard with the A/C option, the brick guard should be mounted underneath the condenser and use the same hardware that is supplied with the A/C kit. Discard P/N 0641608, 3271601, 4711600 and 4761600.
