

# LSI FIELD INSTALL KITS ACCESSORIES

## TELEHANDLER LSI FIELD INSTALL KITS

Load Stability Indication (LSI) is a system that aids operators by helping them to remain within the forward load capacity of the telehandler. This system enhances operator safety and confidence by providing reliable stability monitoring and controlled recovery options.

### FEATURES AND BENEFITS:

- LSI actively monitors load capacity to prevent tipping accidents
- Real-time monitoring ensures safe operation in all conditions
- Clear visual indicators & audible alarm to warn of potential instability
- Active and passive modes adapt to various working scenarios
- LSI enables safe and efficient telehandler operations
