

PLATFORM SOFT TOUCH KITS

RETROFIT KITS-SCISSORS

Protect Your Machine and Surroundings

Protect your machine and surroundings with a Soft Touch Kit from JLG. The soft touch system mounts proximity switches and padding around the platform. If the proximity switches come in contact with an adjacent object, platform functions are deactivated, increasing protection for the machine and its surroundings. For convenience, an override button permits “undoing”.

FEATURES / BENEFITS

- Increases the protection of the machine and its surroundings.
- Designed for use near delicate areas.
- Helps increase the versatility of your machine.
- Kits include instructions and all required components to install the Soft Touch Kit to existing machines (applicable models only).
