

COILED CONTROL CABLE KITS

SERVICE KITS

Coiled Control Cable Kits Available for ES Scissor Lifts

Coiled control cable kits are available for JLG® ES Scissor Lifts. These kits are designed to retrofit those machines built prior to May 2007, but also make it simple to replace the control cable on newer models as well. The coiled cable provides better management of the platform workspace and allows the platform extension to move in and out without interference, all while keeping the cable out of the operator's way and off of the platform floor.

These kits come complete with installation instructions, new corner hooks, and any required hardware, all at a substantial savings over buying the cable alone.

Features and Benefits Include:

- Coiled control cable installation kits include:
 - Installation instructions
 - Corner hook for cable storage
 - All required hardware
- Approximate installation time is 30 minutes
- Clips replace previously used wire ties

ES MODEL	JLG PART NUMBER
