

Upfit Your JLG® Electric R Series Scissor with Wireless Control

JLG™ Mobile Control kits from JLG allow you to **drive, steer** and **load** your stowed scissor lift from your mobile device.

Install JLG Mobile Control on Your Machines

When your machine is equipped with JLG Mobile Control, you can:

- **Operate** your scissor from up to a 40' distance with Bluetooth® enabled technology, allowing better visibility of possible obstructions while maintaining a safe distance from the machine
- **Position** your machine into tight spots or navigate through areas with low clearance from outside, and away from, the platform
- **Load** your machine onto trucks at the end of the work day with ease, from the ground and at a distance from the truck and machine

How JLG Mobile Control Works

Once your machine is equipped with the JLG Mobile Control hardware:

- **Download** the JLG Mobile Control app on your iOS or Android mobile device
- **Open** the app and scan the machine-specific QR Code on the machine
- **Use** the app to drive and steer your machine
