

# BLUE LEAF<sup>®</sup> DIESEL EXHAUST FLUID (DEF) OIL

## PROTECT YOUR TIER IV FINAL DIESEL ENGINE WITH BLUE LEAF DEF FLUID

Most Tier IV Final Engines 75hp and above require DEF. JLG Industries, Inc has expanded its parts program by offering Diesel Exhaust Fluid (DEF). DEF is a product that is used to meet emission regulations that require diesel vehicles to significantly reduce harmful emissions and particulate matter. DEF is used to chemically reduce NOx emissions into harmless nitrogen and water through selective catalytic reduction (SCR) in which DEF is sprayed into the vehicle exhaust system.

JLG is pleased to offer our customers BlueLeaf DEF which has been certified by the American Petroleum Institute.

### Features

- Blue Leaf is suitable for any make/model with a Tier 4 Final engine
- Blue Leaf is committed to providing high quality DEF products
- The Blue Leaf parent company has been a pioneer in the DEF market
- Reliable and cost efficient DEF solution for your fleet
- Savings over 18% when ordering bulk

PACKAGE SIZE	PART NUMBER
2.5 GALLON	70011378
55 GALLON DRUM	70011624
330 GALLON TOTE	70011625
BULK*	70013787

\*See Page 2 for details on bulk ordering

### TIPS FOR USE

- Products supplied by Blue Leaf will arrive in dedicated sealed packages
- DEF should only be filled in the DEF reservoir on your equipment and never mixed with any other substance
- DEF freezes at 12° F

### REFRACTOMETER

To ensure your DEF Solution is at the correct specification, consider purchasing a Refractometer. A refractometer is an instrument used to measure the refractive index of a liquid, which is then used to determine the concentration of a dissolved substance.
