

PROGRAMMABLE SECURITY LOCK ACCESSORIES

MAINTAIN MACHINE SECURITY

Protect your investment with an easy-to-install Programmable Security Lock that prevents unauthorized operation of the machine. The Programmable Security Lock limits equipment access to only users who enter a four-digit operator's code. A master code allows supervisors to enable or disable operator access codes at any time, to offer additional control over authorized use.

Features/Benefits:

- Universal
- Re-programmable
- Supports up to 99 unique users
- Limits use when equipment is on site with multiple contractors
- Works on internal combustion and electric-powered units
- Accumulates total vehicle usage time, accessed through the supervisor code
- Maintenance alert option
- One year warranty

Specifications:

- **Case:** ABS Plastic 5.125" x 2.750" x 1.080"
- **Keypad:** Contacts internally sealed, moisture resistant
- **Voltage:** Input range 12-960V DC
- **Current:**
 - Less than 90 mA with unit active.
 - Less than 30 mA with unit inactive
- **Output:**
 - Contact rating up to 10amp maximum through 48V
 - Maximum 1A contact rating above 48V
 - For loads greater than 10A use external relay

MACHINES AND MODELS	JLG PART NUMBER
Any internal combustion and electric-powered machines; including Telehandlers, Aerial Lift Platforms, Scissors, Vertical Machines and Fork Lifts	1001099389

NOTE: The external case of the Programmable Security Lock+™ has been sealed for your protection. There are no user serviceable parts inside. Breaking the unit seal voids the warranty.
