

REVERSE SENSING SYSTEM ACCESSORIES

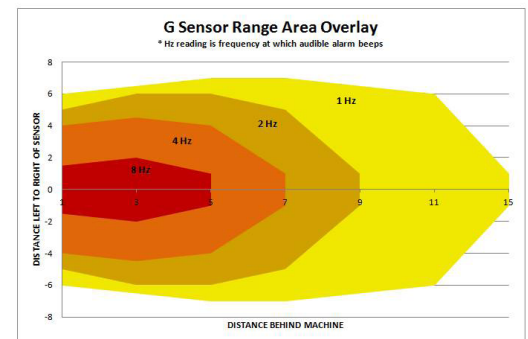

Detect Objects in Your Machine's Path When Traveling in Reverse

JLG is pleased to announce the availability of the reverse sensing system, designed to detect objects in the path of the machine when traveling in reverse. The reverse sensing system will notify the operator with an audible alert, when an object is within a relative distance of the machine's path. The closer the telehandler gets to an object, the faster the rate of the audible alert.

Features and Benefits Include:

- Utilizes pulse radar technology to detect moving and stationary objects.
- Audible alarm mounted in the cab.
- Four detection zones - audible alarm will sound from 1 tone per second to 8 tones per second based on the zone where the object is detected.
- Can be retrofit to JLG® G and SkyTrak® Legacy model machines.

Make	Model	Serial Number Break	Part Numbers
JLG*	G5-18A	ALL	1001253828
	G6-42A, G9-43A/G10-43A, G10-55A/G12-55A	ALL	1001253826
