

BOOM MESH KITS ACCESSORIES

KEEP CONTENTS INSIDE THE PLATFORM

JLG® platform mesh kits are designed to help keep tools and materials within the work area while maintaining visibility and airflow. Available in three material options and mesh-to-top rail or mesh-to-mid rail configurations, these kits are designed offer flexible options to suit a variety of jobsite needs.

FEATURES AND BENEFITS

- Helps keep tools and materials inside the platform
- Designed with operator visibility in mind
- No drilling or welding required for installation
- No interference with platform controls
- For swing gate entry only
- Two material options to meet jobsite needs
