

Save Time and Money

Fully utilize your boom lifts with the JLG SkyWelder[®]. A 280 amp Miller[®] CST 280 welder positioned beside the control station conserves space and provides fully-integrated welding capability. Free yourself from potentially dangerous leads hanging over the rails and the unnecessary cost of a stand-alone welder and power supply.

Features and Benefits Include:

- Save time by eliminating the need to move weld leads and reposition the welder, resulting in an average time savings of 1.25 hours per shift, which can result in a savings for a 20-day work month of \$880 per welder.
- Save on fuel costs by using a diesel powered welder/generator (assuming an 8 hour work-day and 4 week month) operating at 75% of the time, which results in an additional fuel cost of \$112 per month.
- Save on rentals with the average freestanding welder renting for about \$425 per month, plus \$100 for weld leads and additional delivery charges.
- Reduce weld cable damage with factory-routed cables. An average of \$150 in material plus lost productivity per incident of \$44 per hour, or a total of \$194.

JLG [®] Machine Models	Description	JLG Part Number
400S/460SJ, 400S/460SJ HC3, 450AJ, 450 AJ HC3, 600S/660SJ, 600S/660SJ HC3, 600A/AJ, 600AJ HC3, 800A/AJ, 800S/860SJ, 800S/860SJ HC3, 1100S/SJP, 1200SJP, 1250AJP, 1350SJP, 1250AJP, 1350SJP, 1500SJ, 1850SJ	SkyWelder [®] with Installation Kit	1001263395
