

# TOUCAN MAST BOOM SKYGUARD

## ENHANCED CONTROL PANEL PROTECTION

SkyGuard™ provides the operator and control panel with enhanced protection that doesn't limit platform workspace or visibility. When the sensor is activated by approximately 5lbs of force or more, SkyGuard stops all functions in use at the time and its unique reverse functionality -- the first feature of its kind in the market -- temporarily reverses most functions for a short period of time. SkyGuard is available exclusively from JLG.

### FEATURES AND BENEFITS:

- Can be activated from a variety of angles.
- Cuts out functions and temporarily reverses most, but not all, that were in use at the time of activation for less than a second.
- Does not limit platform workspace or operator visibility.
- No moveable parts means there's no need for scheduled or additional maintenance.

MACHINE MODELS	SERIAL NUMBER	KIT NUMBER
