

# WHITE NOISE ALARM KIT

## TELEHANDLER ACCESSORIES

### SMARTER DIRECTIONAL SOUND

This advanced multi-frequency back-up alarm delivers a highly effective warning signal when equipment is in reverse. Unlike traditional single-tone alarms, it emits sound across multiple frequencies, creating a more localized and less disruptive alert.

By attenuating sound above 4000 Hz, the signal appears to dissipate more quickly—reducing unnecessary noise while maintaining clear, directional awareness for those nearby.

### FEATURES AND BENEFITS:

- Reduced Noise Impact - Sound dissipates faster than conventional pure-tone alarms
- Simple Retrofit Installation - Replace existing alarms quickly —no complex modifications required
- Durable, Sealed Construction - Designed to withstand dust, moisture, and vibration in demanding environments
- Multi-Frequency Output - Emits sound across a range of frequencies attenuated above 4000 Hz for optimized performance

### SPECIFICATIONS:

- Voltage: 12-24VDC
- Amps: 0.8
- Volume: 107
- Temperature Range: -40F to +185F
- Frequency: 700 to 2800 Hz
- Approval: SAE J994 Type B, CE, R10, AMECA, IP66
