

TELEHANDLER BOOM PROP TOOLS

SECURELY SUPPORT YOUR JLG TMH BOOM FOR SERVICE AND MAINTENANCE

JLG now offers a machine-mounted, factory-approved boom prop for your telescopic material handler (TMH). JLG-designed and built to last, this device will mount to your JLG machine (see detail below) using pre-existing holes.

The prop itself separates from the mount and can easily slip over the lift cylinder rod to securely support the boom to allow for maintenance, cleaning, or pressure checks. When finished, simply secure the prop back to its mount and get back to work!

Features and Benefits Include:

- Secures boom during service and routine maintenance
- Mounts using pre-existing holes
- Prop secures to mount while not in use
