

Bi-Energy Puts The Power In Your Hands

Why choose between engine and battery to power your JLG® Compact Crawler Boom when you can have both! The bi-energy option on select compact crawlers gives you the flexibility to choose your independent power source based on your job site, your needs. A machine with bi-energy includes the models' full-size Lithium-Ion battery pack and diesel engine to maintain high performance and peak efficiency.

KEY FEATURES

- Maximize productivity by equipping the machine with two, full-size, independent power sources
- Peak efficiency while traversing around or to a job site using diesel engine power, environmental-friendly working indoors using Lithium-Ion battery power
- Ease of familiarity with same joysticks and keyboard as other remotes
- Optimum design with only two new buttons to switch between the independent power sources
