BRING THE POWER OF VIRTUAL REALITY TRAINING TO YOUR FACILITY

There's a brand-new way to experience training—and it's now available to customers nationwide. AccessReady Fusion XR is a cost-effective VR training simulator for booms and scissor lifts, that leverages cutting-edge technology to help trainees practice the hands-on skills they need in an immersive virtual environment. Invest in the training simulator that will propel you and your team to new levels of success.

To see how AccessReady Fusion XR delivers the most advanced, on-site training at your facility, visit jlg.com/ARXR

Benefits of AccessReady Fusion XR Virtual Reality Training

Virtual reality training translates into real-world applications more quickly, while decreasing trainee time to proficiency and idle time during training. That means your training program is more efficient, more effective and more engaging.

Reduced Training Costs

Taking your entire team to off-site training classes isn't always an option, but now you can bring VR training to your facility where employees can practice until they're ready for their formal evaluation. AccessReady Fusion XR also increases hands-on controls training without the expense of running a machine.

Cooperative Training Options

You can network multiple simulators together for a multi-user experience or use instructor-led mode to create your own scenarios. Plus, VoIP support provides real-time voice communication between trainers and trainees who may not be in the same room, state or even country.

Higher Quality Practice Time

Increasing hands-on training can reduce evaluation time. Let trainees practice their skills in a virtual environment that provides real-time interaction and true-to-life job site scenarios, so they have more confidence when they step into an actual machine.

Advanced Skills and Evaluation

New Scenario Manager allows instructors to create and save training scenarios to test various skills and select the criteria used to monitor trainee performance.

Complete job site challenges

Develop skills on the proving grounds

Use real-world controls

WHAT YOU GET WITH THE ACCESSREADY FUSION XR SIMULATOR PACKAGE

When you purchase AccessReady Fusion XR, you get the full AccessReady Fusion XR training simulator package, backed by the knowledge and expertise of our training specialists.

The AccessReady XR training simulator package includes:

- 6 foot custom JLG platform with boom and scissor lift controls
- HTC VIVE PRO headset and Leap Motion camera
- VR-ready PC pre-loaded with AccessReady Fusion XR software
- Keyboard with touchpad and monitor
- Portable cabinet to house the PC, VR headset and other items
- System setup and operating instructions

Get Advanced Training for Less

Priced well below competitive options, the AccessReady Fusion XR training simulator brings cutting edge hands-on controls training to your facility for less. Your initial purchase of the simulator comes with a software package and an annual license, which will automatically update the software with any changes for one year. After the first year, there is an annual renewal fee to ensure your system has the most current updates.

*If you opt out of the annual renewal, your system will still work, but it will no longer update to the most recent version of the software.
